How can a shopkeeper recognise a task before reading the label?

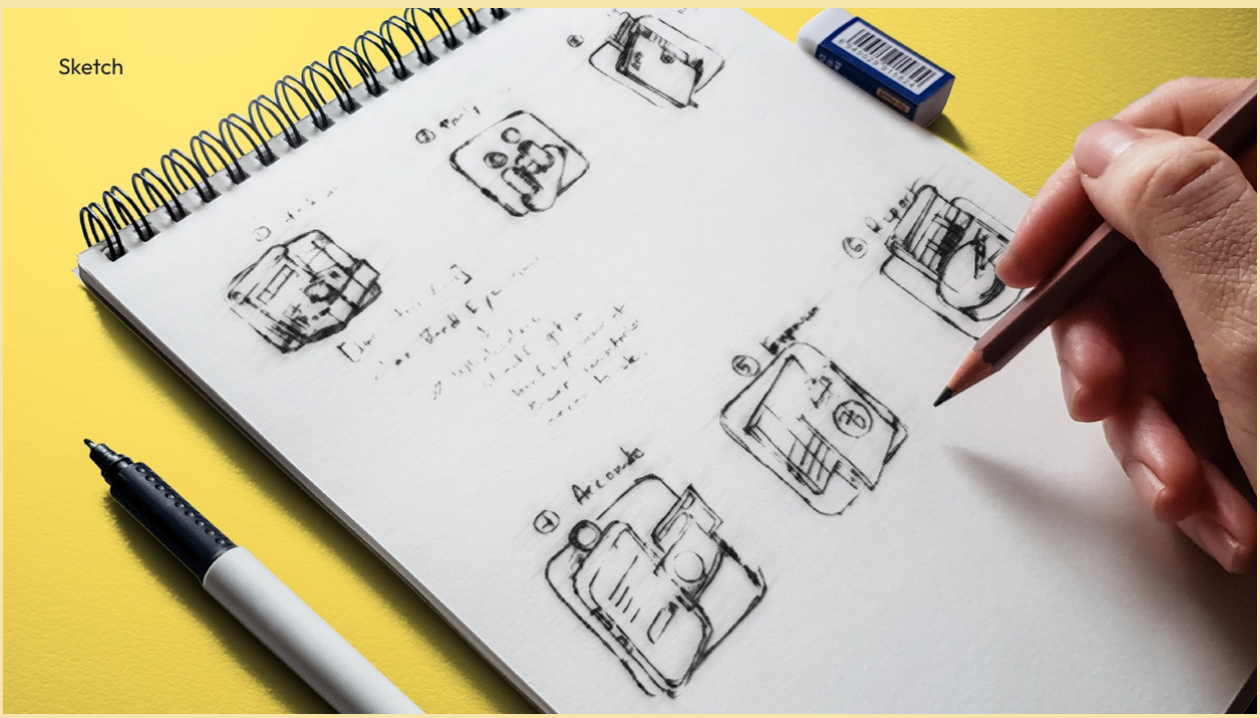

An isometric icon set for Hishabee's business app.

Isometric
Icons

Find an object for each action.

The sketchbook tests forms for familiar shop tasks. A ledger, a product and a contact can each start with a different object.

ORIGINAL NOTEBOOK SKETCHES

Make the three daily tools look distinct.

Party Khata, Accounts and Product List each use a different silhouette. A shared isometric angle makes them feel like parts of one interface.

ORIGINAL PARTY KHATA, ACCOUNTS AND PRODUCT LIST ICONS

Icons

Use the same perspective for four more tasks.

Stock Khata, Business Report, Pending Payments and Expenses extend the system with boxes, books, charts and a storefront.

ORIGINAL ICONS FOR STOCK, REPORTING, PAYMENTS AND EXPENSES

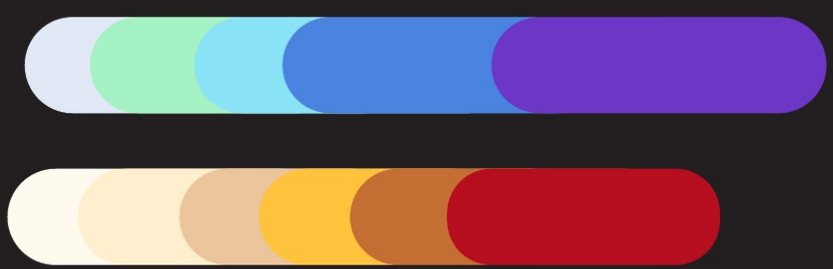

Use colour to make the objects easier to read.

The palette groups cool blues and violets with a range of warm yellows and reds. Lighter and darker faces give the small illustrations their sense of depth.

ORIGINAL ICON COLOUR RANGES

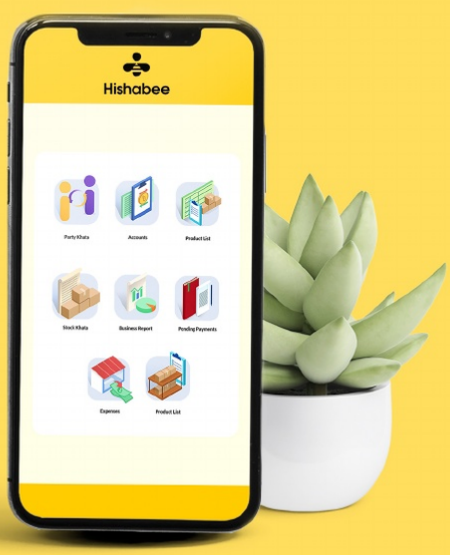

Colors

Check the set at the size it will be used.

The phone mockup puts the icons together on one screen. Each needs a clear outline when the whole set is visible at once.

ORIGINAL HISHABEE APP MOCKUP

Make each tool feel familiar at a glance.

Every icon has its own subject. The shared angle, shading and scale give the set a consistent place in the app.

ISOMETRIC ILLUSTRATION AND APP ICON SYSTEM

Connect the unconnected.
